

09/879,675

6 25. A self-service terminal comprising:
means defining a media entry slot;
a number of shutters movable into at least partly overlapping relationship with
the slot, the number of shutters comprising a number of paired opposed shutters; and
a controller for moving the shutters relative to the slot to define an entry
aperture.

REMARKS

Reconsideration of the application in view of the present amendment is respectfully requested.

The title of the present application is objected to for not being descriptive. The title is amended to overcome the objection.

Claims 1, 2, 6-10, and 14-19 are canceled.

The Office Action states that claims 3-5 and 11-13 are objected to as being dependent upon a rejected base claim but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 3-5 and 11-13 are canceled and new claims 20-25 are added in their place. It is believed that each of claims 20-25 is in condition for allowance.

In view of the foregoing, it is submitted that the application is in condition for allowance, and allowance of the application is respectfully requested.

Respectfully submitted,

Michael Chan
